The Material

The Quality in Detail

Tarpaulin material AEROTex® - PLAN^{PRO}: Disinfectable, tear and abrasion resistant and environmentally friendly recyclable.

"Durability even under the toughest operating conditions."

① Our AEROTex® - PLAN^{PRO} in luminous red was specially made in RAL 3024. This complies to the fluorescent red of the standard DIN EN 1789, Appendix A.

Further colours: 

② Two flat front compartments - only on the GTB model (e.g. as a document compartment / compartment for cervical collars)

③ Highly reflective strips 

④ Transparent window for inserting labels

⑤ Padded back area

⑥ Individually replaceable back carrying straps at any time

⑦ Quality with recognition factor 

⑧ Reinforced edge protection and abrasion protection through the processing of PVC and CSM on the wear-sensitive points and surfaces

⑨ Robust, non-slip carrying handles with closed surface, additionally riveted

⑩ Easy-grip, disinfectable zipper pullers (loop shape)

⑪ Extra strong and double riveted metal eyelets for back carrying straps with colour markings R / L (alignment)

⑫ Optionally available pelvic strap

⑬ Optionally available chest strap

①
**Luminous Red
RAL 3024**

⑩ Item No.: HT10-ZP02C-GR/10

⑫ Item No.: HT13-SPGT-GB1-0

⑬ Item No.: HT13-SPGT-GBR1-0

Magnetic Modular System

What exactly does this mean?

Ferromagnetic plates are incorporated in a predefined grid and thus give the colour-coded modular bags with incorporated magnets a secure hold.

The arrangement of the modular bags, which is based on the grid, enables you a clear and individual organization of the backpack / bag.

Thanks to the modular system, the interior can be produced almost entirely without dirt traps such as hook and loop strips or fixation loops. The risk of germ contamination is significantly reduced.

How is the grid structured?

All AEROCASE® - PROpack Backpacks are equipped with a 4 x 7 grid (28 magnetic fields), the AEROCASE® - PRObag Bags with a 4 x 4 grid (16 magnetic fields).

The horizontal or vertical alignment of the available modular bags is based on the rectangular grid fields.

A wide range of horizontally or vertically insertable modular bags is available to you for a complete and individual assembly.

AEROCASE® - PRObag

Incorporated and movable ferromagnetic plates in the individual grid field prevent a punctual abrasion of the material

The Elementary Concept

Construction of the backpacks with lower and upper shells / lids

Depending on the model, our emergency backpacks and bags are designed to either have

- a lower shell with an integrated grid with magnetic technology and a lid (model: PROpack GTS)
- or
- a lower shell and a lid with external compartments with an integrated grid with magnetic technology (models: PROpack GTA 1 | GTA 2)
- or
- a lower and an upper shell with an integrated grid with magnetic technology (models: PROpack GTD | GT | GTB | as well as all PRObag)

The lower shell is the same for each model and only the upper shells / lids indicate the different version / use:

- Upper shell PROpack GT and GTB: suitable for holding 9 cm and 13 cm high modular bags
- Upper shell PROpack GTD: suitable for holding 9 cm high modular bags
- Lid PROpack GTA 1 with outer compartments: suitable for holding a 4 x 4 ampoule case in the external quick access slide-in compartment as well as an additional outer pocket underneath for holding a 4 x 3 modular bag, for example
- Lid PROpack GTA 2 with outer compartment: suitable for holding a 4 x 7 ampoule case in the external quick access slide-in compartment over the entire front

Different heights on the inside: lower shell 13 cm | upper shell 13 cm and / or 9 cm

AEROCASE® - PROpack GTS | GTA 1 | GTA 2 | GTD | GT | GTB

Customizable Basic Models

Emergency backpacks "Made in Germany", with magnetic, colour-coded grid modular system for individual modular bag assembly. Due to the applied ultrasonic welding technology, dirt traps such as hook and loop strips can be completely dispensed with and the risk of germ contamination is thus significantly reduced.

AEROCASE® - Modular Bags

Customizable Basic Models

Structured modular bag system in 9 different sizes (grid) for a complete and individual assembly of your bag or backpack. The modular bags can be colour-coded according to your purpose of use and designed individually. They are placed in the interior using a flexible magnetic system, depending on the alignment (horizontal or vertical).

Horizontal alignment

These modular bags can be placed horizontally in the interior, in accordance with the grid.

Grid example 4 x 3

All sizes at a glance

2 x 1

2 x 2

4 x 1

4 x 2

4 x 3

4 x 4 (Ampoule case)

Vertical alignment

These modular bags can be placed vertically in the interior, in accordance with the grid.

Grid example 2 x 4

2 x 3

2 x 4

2 x 7 (Oxygen unit)

Das AEROCASE® - Modular System

A newly developed modular system for high demands and no more standard modular bags that are only suitable for one single purpose. Configure your modular bags individually according to your needs from various individual components. Fast, flexible and can be converted for any bag filling without much effort.

Configurable for every purpose of use

- ❶ Body with elastic loops in the bottom, available in 9 different sizes
- ❷ Lid outside, available in 7 different RAL colours
- ❸ Lid inside, available with mesh or elastic loop variations
- ❹ Dividers for buttoning (on both sides), available with mesh, elastic loop variations or snap buttons for attaching transparent compartments
- ❺ Partitions for dividing the body
- ❻ Loop strips for buttoning (on both sides), using snap buttons, available in different variants

Examples for different operational uses

Further information can be found in our catalogue AEROCASE® - Modular System - available from your AEROCASE® - Specialist Dealer.

AEROCASE® - Modular Bags - Configuration

Example for AEROCASE® - PROpack

Example for AEROCASE® - PRObag

AEROcase® - EASY Click

Customizable EASY Click System

Easy and quick fixation and withdrawal of ampoules up to 17 mm in diameter.

Model

EASY Click - Ampoule Rail Set, for 2 x 4 Ampoule Case
(Including 1x rail, 2x rail tail adapter and 20x clip)

- 1 - 2 ml ampoule fits 11 times on 2 x 4 ampoule rail
- 5 ml ampoule fits 8 times on 2 x 4 ampoule rail
- 10 ml ampoule fits 7 times on 2 x 4 ampoule rail

EASY Click - Ampoule Rail Set, for 4 x 4 Ampoule Case
(Including 1x rail, 2x rail tail adapter and 20x clip)

- 1 - 2 ml ampoule fits 16 times on 4 x 4 ampoule rail
- 5 ml ampoule fits 12 times on 4 x 4 ampoule rail
- 10 ml ampoule fits 11 times on 4 x 4 ampoule rail

Sample Assembly

Application

1. Squeeze the clip and place it on the rail

2. Position the clip as needed

3. Release, squeeze the bottom end parts, fixed

4. Ready for assembly!

Further information can be found in our catalogue AEROcase® - Modular System - available from your AEROcase® - Specialist Dealer.

Filling for illustration purposes only, not included in the scope of supply.

AEROCASE® - OXYbag

Compact oxygen bags for oxygen cylinders up to 2 liters, available in "Small" (as a "slim" version without front pocket) and "Medium".

- All-round padding and with integrated plastic plate for interior protection and preservation of form stability
- Safe fixation of the oxygen cylinder thanks to stable fastening straps in the main compartment
- Regulation of the O₂ flow and control of the cylinder contents via EASY Access Window
- Storage of the oxygen equipment in the internal storage compartments and the front pocket (only OXYbag M2)

1 OXYbag S2

2 OXYbag M2

with additional front pocket

EASY Access Window

- Permanent option to regulate the O₂ flow via magnetic EASY Access Window
- Continuous control of the oxygen cylinder contents

Locking strap

To restrict the max. opening width

Filling for illustration purposes only, not included in the scope of supply.

Pleasant carrying comfort

- Padded shoulder carrying strap
- Magnetically closable fastening straps for the safe transport to a stretcher

SIMS - Snap In Magnetic System

Fastening straps with magnetic buckles

Open: pull off sideways

Close: put on straight and let click into place

AEROtex® - PLAN ^{PRO} (Truck tarpaulin)	■ Gentian Blue (RAL 5010)	S	approx. 52 x 22 x 14 cm	approx. 1.1 kg	approx. 13 l	① HT13-OXYBS2-1
		M	approx. 52 x 22 x 20 cm	approx. 1.4 kg	approx. 19 l	② HT13-OXYBM2-1

Upon request also available with a logo print on the reflective strip - minimum purchase 50 pieces

AEROcase® - IMMObag

Compact emergency bag for your immobilization equipment.

Thanks to its special design, the IMMObag L2 offers the possibility of storing all relevant products (e.g. EASY Splint Universal Splints, EASY Collar Cervical Collars, KED systems, vacuum splints, pelvic slings, etc.) in a single bag and carrying them along to the place of action.

The compartment on the front and on the back enables a quick access to the material. The compact form and the tarpaulin reinforced handle allow a balanced carrying comfort. Optionally available carrying straps offer the possibility of attachment directly to the spineboard in a few simple steps.

Perfectly equipped for the immobilization - structured and well thought-out

Balanced carrying comfort

- Thanks to the tarpaulin reinforced handle and compact form

Additional handles

- For placing upright
- Attachment to the spine board

Subdivided compartment

- With 6 compartments for holding cervical collars and pelvic slings

Front

Back

**Main compartment**

- Large storage space for holding a KED system or alternatively a vacuum splint set

Large front compartment

- Equipped with horizontal double loops on the left and with vertical loops on the right
- For holding splints, pelvic slings, spiders, etc.

Filling for illustration purposes only, not included in the scope of supply.

Attachment option

- Optionally available carrying straps for attachment directly to the spineboard

Upon request also available with logo embroidery - minimum purchase 50 pieces

AEROCASE® - Device Bag for corpuls³ - Standard | Slim

Robust emergency device bag, especially developed and tested for the corpuls³ patient monitor with integrated defibrillator, for the safe transport and unrestricted operation.

- Reliable protection of the device as well as the accessory parts
- Unrestricted access to the user interface without having to take the device out of the bag
- Two side pockets, each with two separately accessible zipper compartments, offer enough storage space for the necessary utensils
- Magnetic buckles on two fastening straps enable the quick and safe attachment to a stretcher

Tested safety

- Compliant acc. EN 1789, section 4.5.9 (10 g test)
- Emergency vehicles and their equipment - ambulances -

Conspicuous design

Thanks to the reflective strips, the bag can be seen at all times. Accidentally leaving at the place of action is a thing of the past.

- Luminous Red RAL 3024 / Black
- Highly reflective strips

2 spacious side pockets

- No squeezing when storing all the necessary utensils
- Flexibility in assembly
- Enough storage space for:
 - ECG adhesive electrodes and child / infant accessories or alternatively hard paddles individually (excluding child / infant accessories)
 - Small and large blood pressure cuff
 - Cable for instruments listed above
 - Wet shaver
 - Printer paper roll (ECG)
 - Spare adapter for tube

2 side pockets, each with 2 zipper compartments

Fig. with endotracheal adapter for single use

Labelling

- Transparent compartment for customized labelling ①
- Viewing window for type label ②

For a safe / trouble-free storage of the CO₂ sensors, these should be pre-connected and adapted in the CO₂ adapter* for single use ③.

- Faster operating times
- No error messages

*Adapter for single use is not included in the scope of supply

SIMS - Snap In Magnetic System

Fastening straps with magnetic buckles

Viewing and operating window for the display of the patient box

Easy to use

- Practical and quick access to the user interface
- Access and monitoring without removing the device

Screw set for ampoule rails	3x screws M3x10, DIN 966 3x screw nuts, DIN 934 3x rosette M3, DIN 88966	-	HNK01-ALBS

The perfect solution for attaching in the vehicle

EASY Click - Ampoule Rail System

Are you still looking for an ideal attaching option in the vehicle and you are not satisfied with the usual solutions?
With our EASY Click - Ampoule Rail System, we offer you an ideal solution!

- Suitable for the flexible storage of all required ampoules in the medicine cabinet
- Innovative option for the safe transport of ampoules and vials
- For an easy and fast fixation as well as removal of the ampoules
- Made of high-tech plastic
- For ampoules up to 17 mm in diameter

You can find more information about our EASY Click models, application as well as variably attachable individual components from [page 40](#) or from your AEROcase® - Specialist Dealer.

Application example on acrylic removable plate in the medicine cabinet

Filling for illustration purposes only, not included in the scope of supply.

AEROCASE® - MCIS1 | MCIL1 Intubation Bags

Intubation bags EMS in "Small" made of AEROTex® - DURA (Nylon) and "Large" made of AEROTex® - PLAN (Tarpaulin) for the safe holding of laryngoscope, blades, laryngeal masks, etc.

Intubation Bag MCIS1

Space-saving, rollable intubation bag made of durable nylon material AEROTex® - DURA (Nylon).

- High quality nylon: Particularly tear-resistant fibers | Durable and long lasting
- Clearly structured interior with wide, stable fixation loops
- Spacious inner pocket that can be closed separately
- Lateral flaps protect the contents from falling out
- Length-adjustable closure strap with width adjustment via hoop and loop fastener

Intubation Bag MCIL1

Discontinued item

Large spacious intubation bag made of durable AEROTex® - PLAN (Tarpaulin).

- Robust and easy to disinfect
- Many elastic fixation loops for attaching the accessories required for the intubation
- Compartments for storing endotracheal tubes and laryngeal masks
- Transparent window for parts list / labelling
- Hook and loop strip on the back for the optimal attachment in emergency cases
- Bidirectional zipper with zipper puller

AEROCASE® - RBS1 | RBM1 | RBL1

Emergency bag 1R in "Small", "Medium" and "Large" made of AEROTEX® - PLAN (Tarpaulin) or AEROTEX® - PES (Polyester). Ideal for professional first aid. Extremely robust, durable and dimensionally stable constructed as well as equipped with high quality wide zippers.

Size S

For holding of smaller basic equipments

Size M

With additional extra space for an extended basic equipment

Size L

With divided front pocket, many additional fixation loops, compartments and large lid pocket

Processing details

- Zipper in signal colour for improved visibility
- Wide hook and loop strip (4 cm) for patches
- All-round highly reflective strips
- Transparent compartment for the clearly visible storage of documents and information

Professionally organized

2 large side pockets

- Plenty of optional storage space

Spacious front pocket

- Large front pocket with more sorting options

Protected bottom area

- Trough shaped bottom made of stable tarpaulin material
- 5 robust plastic pyramid feet
- Stability and protection

Wide hook and loop strip for attaching individual patches

5 robust plastic pyramid feet

Zipper in signal colour

Including shoulder carrying strap

Further equipment details RBS1 | RBM1

Clearly arranged interior

- Large and clear space
- Inside zipper compartment in the lid
- Three-part main compartment with fixed interior division
- Reasonable arranged fixation loops
 - in the lid
 - at the inner backside

Flexible

- Compact and space-saving design
- Multifunctional storage compartments
- Easy to use

All-round protection

- Very robust and durable
- Dimensionally stable construction

More room for maneuver

- Supplied with shoulder carrying strap
- Hands free for more mobility

Padded interior division

- Protects the equipment
- Ensures order

Large transparent compartment

- Plenty of space to quickly identify documents and information

Lid for individual labelling

Further equipment details RBL1

Professionally organized

- Very large amount of space for extensive equipment
- Inside zipper compartment in the lid
- Structured, practical interior division
- Interior with variable partitioning system
- Robust fixation loops (Quality A) in:
 - interior
 - side pocket
 - front pocket

Divided front pocket

- Many useful loops and dividers of different sizes
- Can be used e.g. for infusion accessories, diagnostic devices, etc.

Optimal protection

- Reinforced side walls
- All-round padded
- Protected bottom area

Variable interior

- Removable and divisible bars

Elaborately divided front pocket
